

formatting text with face gestures

Alice Strunkmann-Meister, Rodrigo Blásquez

Interaction Engineering - WS 15/16 - Augsburg University of Applied Sciences - Prof. Dr. Michael Kipp

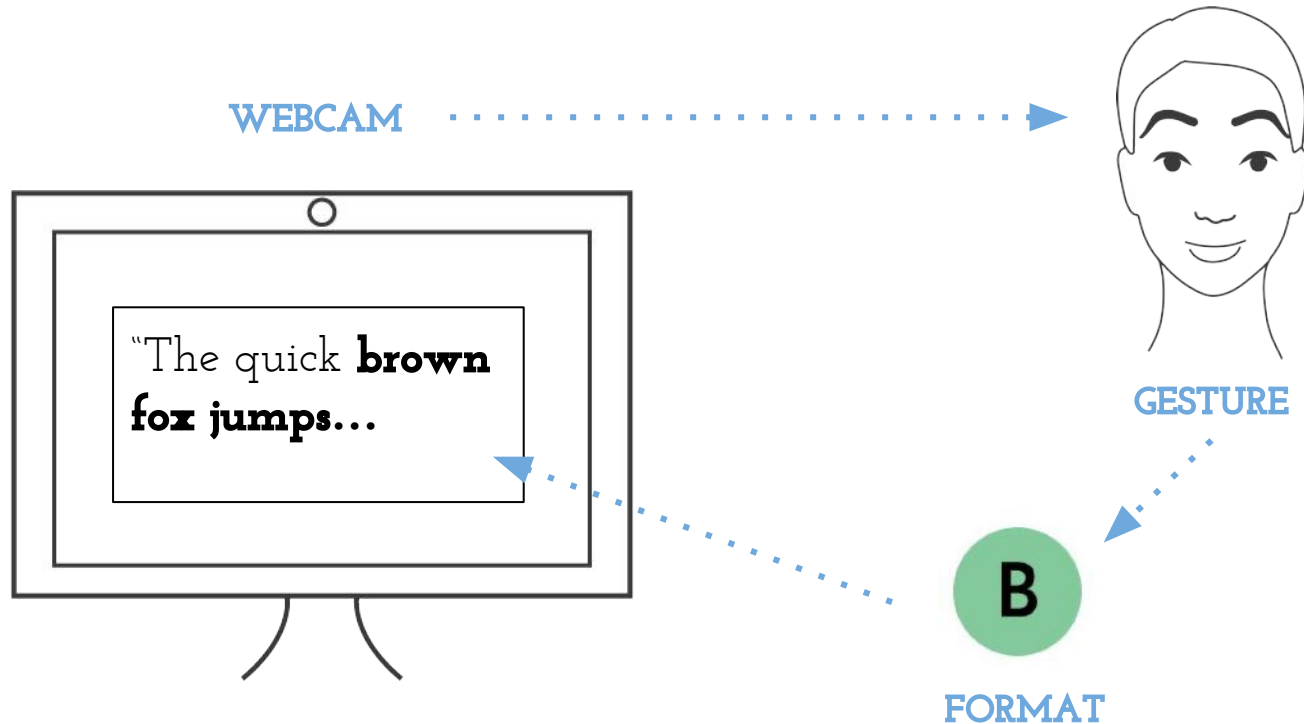

Problem

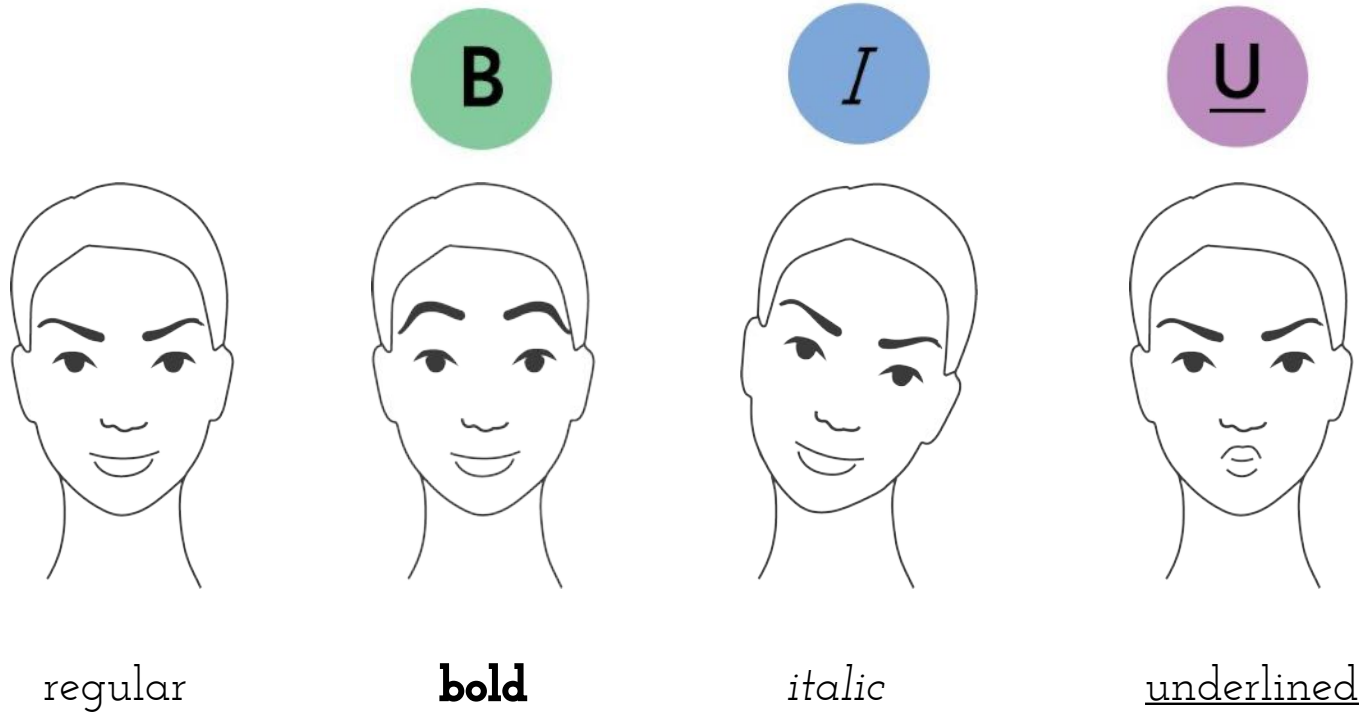

Formatting text is not very user friendly.

Usually, the writing-flow has to be interrupted, to highlight and format the text.

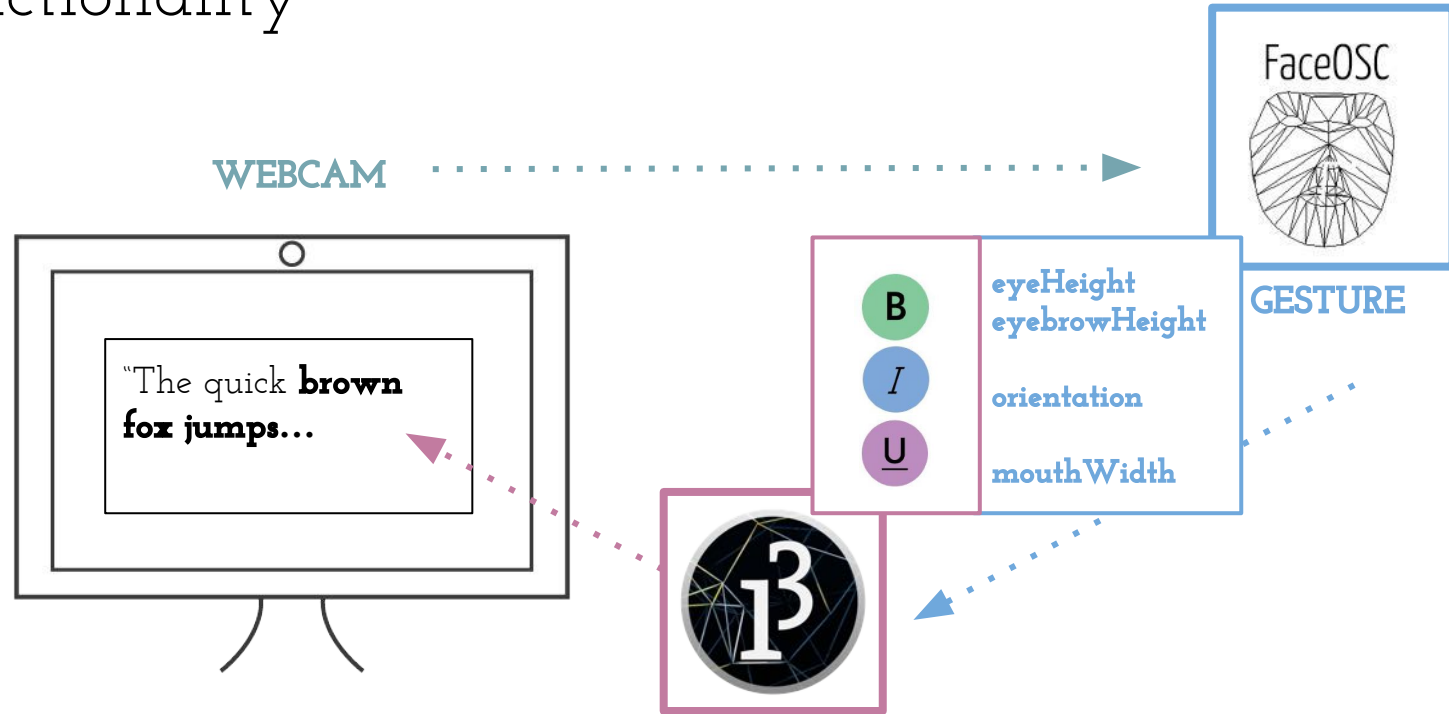

Solution: formatting text with face gestures

Gestures

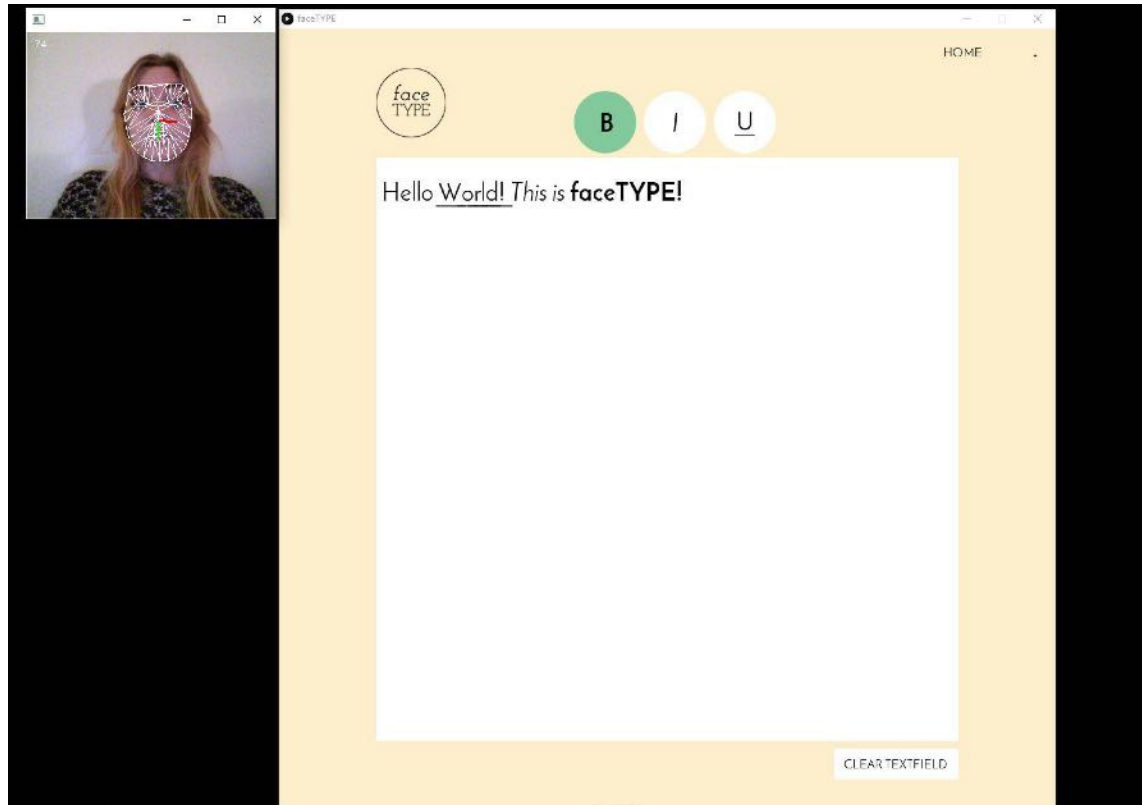

Functionality

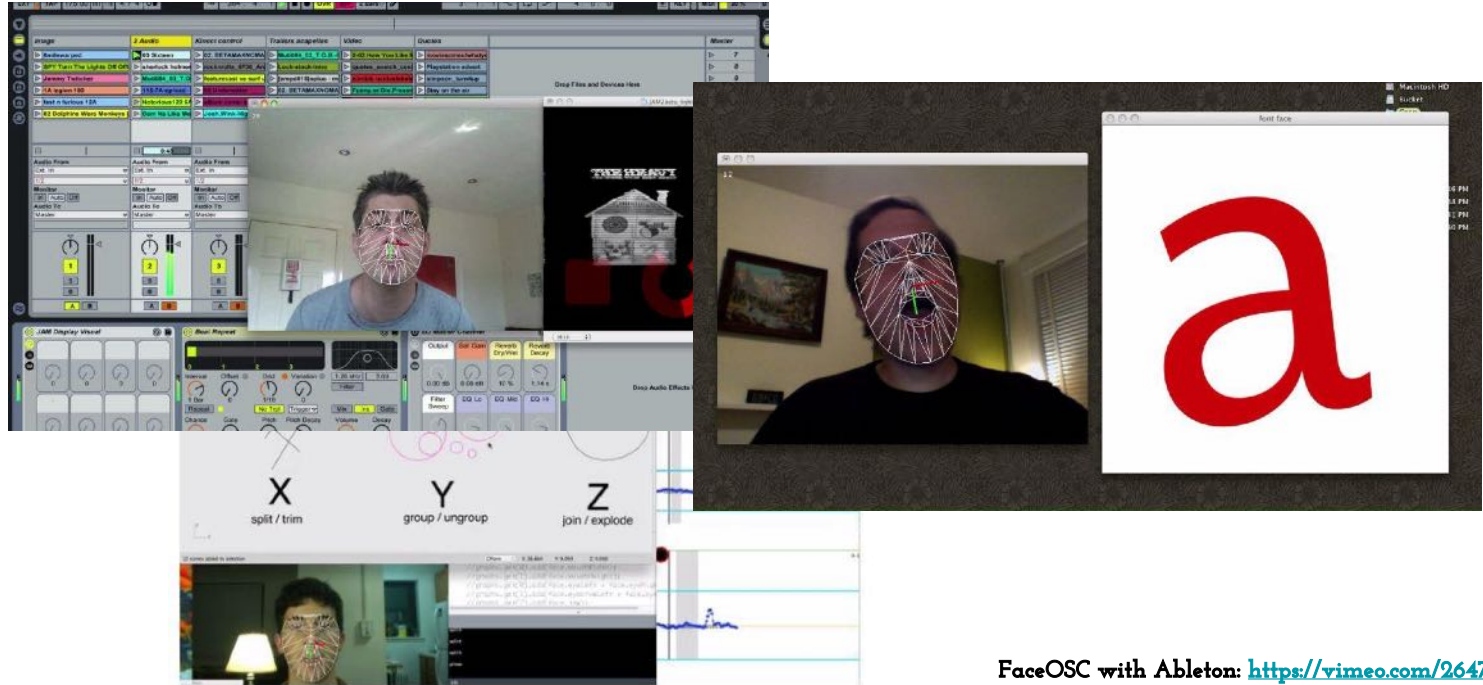

Software: FaceOSC (<http://github.com/kylemedonald/ofxFaceTracker/downloads>) and Processing 3.0.1 (<http://processing.org/download/?processing>)

Live Demo
